

SILSILA HAMDARD

JUNIOR UI/UX/GRAPHIC DESIGNER

PERSONAL PROFILE

My portfolio is available at www.silsila.co.uk

As a UI/UX and Graphic designer, I approach projects from a fresh perspective. By producing these projects I am learning how to approach problems effectively and plan accordingly.

All of the following require creativity, patience and thinking which are skills I both possess and am actively growing. Whether it is working on a new project or designing something very complex, I strive to impress and to ensure my services are valuable.

I am currently working for a company called kindcode as a freelancer. I worked as a junior react developer and after 5 months of development, I changed to a UI/UX/Graphic designer. I am now responsible for UI/UX and branding of this company.

As for now, I would love to join a company that I could work with since I am working remotely as a freelancer all the time. It would be nice to be in an office along with a team I could strive to grow and learn with. I also want to improve my design skills in a creative environment.
